Ben completed his studies in 2004, and brings a customer focussed background to the Natural Area team through his past experience. Ben joined Natural Area in June 2012, initially working as part of the field team and undertaking seed collection work. Since early 2013 he has been working in Programs office and more recently taken on the role of Environmental Programs Manager, working closely with the directors and field operations managers to ensure that all of Natural Area's on ground works are carried out to the satisfaction of our clients. Ben's role predominately include undertaking site inspections, quoting and tendering for works, scheduling works and client liaison for the wide range of Natural Area clients.
