Luke has been with Natural Area since the beginning. He is the Managing Director but takes a hands on approach with projects, clients and staff. Luke has a broad range of practical experience with both on-ground environmental management and business management activities. Many of Luke's successes have been associated with the management of multi-disciplinary teams working together towards an agreed goal. These skills enable him to consult with clients on all project levels and suggest best management strategies for all types of natural environments.
