Environmental auditing
Project management

Sue joined Natural Area in February 2010 as the Senior Environmental Scientist bringing more than 15 years knowledge and experience across a broad range of environmental applications. Her experience includes undertaking a variety of environmental investigations and assessments for government, land developers, industry and the resource sector to assist with statutory approval processes. These activities generally require an assessment of flora, fauna, dieback, wetlands, environmentally sensitive areas, soils and topography. She has also been involved with the preparation of various types of management plans and environmental reports and is an experienced project manager.

Professional Affiliations
