

Natural Area
CONSULTING MANAGEMENT SERVICES

COMPANY PROFILE

Natural Area offers environmental consulting, management and services to Clients in Western Australia. We are a leading provider of on-ground environmental management; employing the largest full time environmental field crew in the state. Our team is as diverse as the projects we undertake, with our environmental consulting, horticultural, project management and field teams all working together to provide the high quality environmental outcomes we're recognised for.

At the core of our business is natural area restoration, conservation and enhancement. Our business has been developed on a reputation built over 12 years of providing excellent service to clients in local and State Government, private and public industries, the mining and resource sector and to private landowners and developers. Natural Area aims to provide and implement practical environmental management for biodiversity conservation and impact management. The range of services we provide along with the technical experience of our team means that we are able to provide a holistic approach to environmental rehabilitation and management. This includes initial consultation and provision of advice on environmental projects, preparation of project plans and proposals, supply of materials and labour for on ground environmental services as well as monitoring and reporting on outcomes.
